QuikDeck®

Technical data

QuikDeck makes it possible to work without interruption, e.g. during renovations of bridges, halls, arenas, stadiums etc. There is usually no need for closures.

Product description	Suspended work platform
Beam lengths	42 83 123 125 128 168 177 208 250 cm
Beam connections	Nodes
Panels	122 x 244 x 1.9 cm
Length of suspension chains	180 360 550 730 1230 cm
Corrosion protection	Load-bearing components are hot-dip galvanised
Load capacity	Up to 300 kg/m ² (load class 4)

QuikDeck®

Work safely

- › Clear and trip-free working environment thanks to clean, smooth surfaces
- › Completely enclosed platform prevents objects from dropping
- › All components are equipped with handles and can be tethered
- › Components that swivel out ensure safe erection from the leading edge
- › Easy and fast assembly without special tools
- › Composite panel can be recycled and is lightweight, fire retardant, weatherproof and UV proof

QuikDeck®

Work productively

- › Installation in the air or on the ground
- › Modular design and adjustable joist allow almost any size and shape structure to be erected
- › High assembly speed due to small number of components
- › Lightweight composite panel further reduces installation time
- › Less transportation due to 50% weight reduction; lower emissions
- › Fewer tying points, therefore less obstruction and interference
- › Factory floor work conditions ensure higher productivity
- › Load capacity up to 300 kg/m² (load class 4) in standard configurations

QuikDeck®

Application & use

Madison Square Garden (New York City)

During renovation work in Madison Square Garden, Penn Station, which is located underneath and serves as a major transportation hub in New York, had to remain open. QuikDeck was the perfect solution for worker access.

Manchester Airport

The QuikDeck suspended access platform enables work without interruption, e.g. during the renovations of the Manchester Airport passenger hall. There is usually no need for closures.

Engineering-Services

Phase 1

We analyse the situation.

Phase 2

We develop the technical drawings and supply the required quantity list.

We can design the most complex projects on your behalf quickly and thoroughly. Starting with the ground plan and facade dimensions, we produce the required structural drawings, determine the precise quantities of materials and supply all the required quantity lists.

We help in finding the right safety and access solution. Transparency, flexibility, cost-effectiveness and safety are a matter of course for us and an integral part of our corporate philosophy.

Phase 3

We plan and implement the realisation.

Phase 4

We assist with project finalisation.

Whatever it takes! We assist you throughout complex construction projects including the engineering of one-off structures. Our mission at all times is to protect you from any unnecessary risks and help you arrive at the best-possible results in every respect.

Application & use

- › Restoration and renovation works on bridges, in railway station or airport buildings, in power stations or on large roofing structures

Why BrandSafway?

Unique combination of expertise & resources

We are part of **BrandSafway**, a leading global provider of access, specialised services and forming & shoring solutions to the industrial, commercial and infrastructure end markets. With more than 340 branches all over the world, we provide support for ongoing maintenance as well as for refurbishment needs and new construction plans.

As one strong team, we support our customers:

- > **Brand Energy & Infrastructure Services** is one of the world's largest industrial services specialists;
- > **Brand Access Solutions** is the UK's largest full-service provider of scaffolding and access systems;
- > **Hünnebeck** stands for safe and highly efficient formwork, scaffolding and safety technology.

> specialty team of ~40,000 People

> 30,000+ customers ... and growing

> ~340 locations in 25 Countries

> revenues of nearly ~\$5b

> assets & equipment worth ~\$4.2b
